

# Book Management System

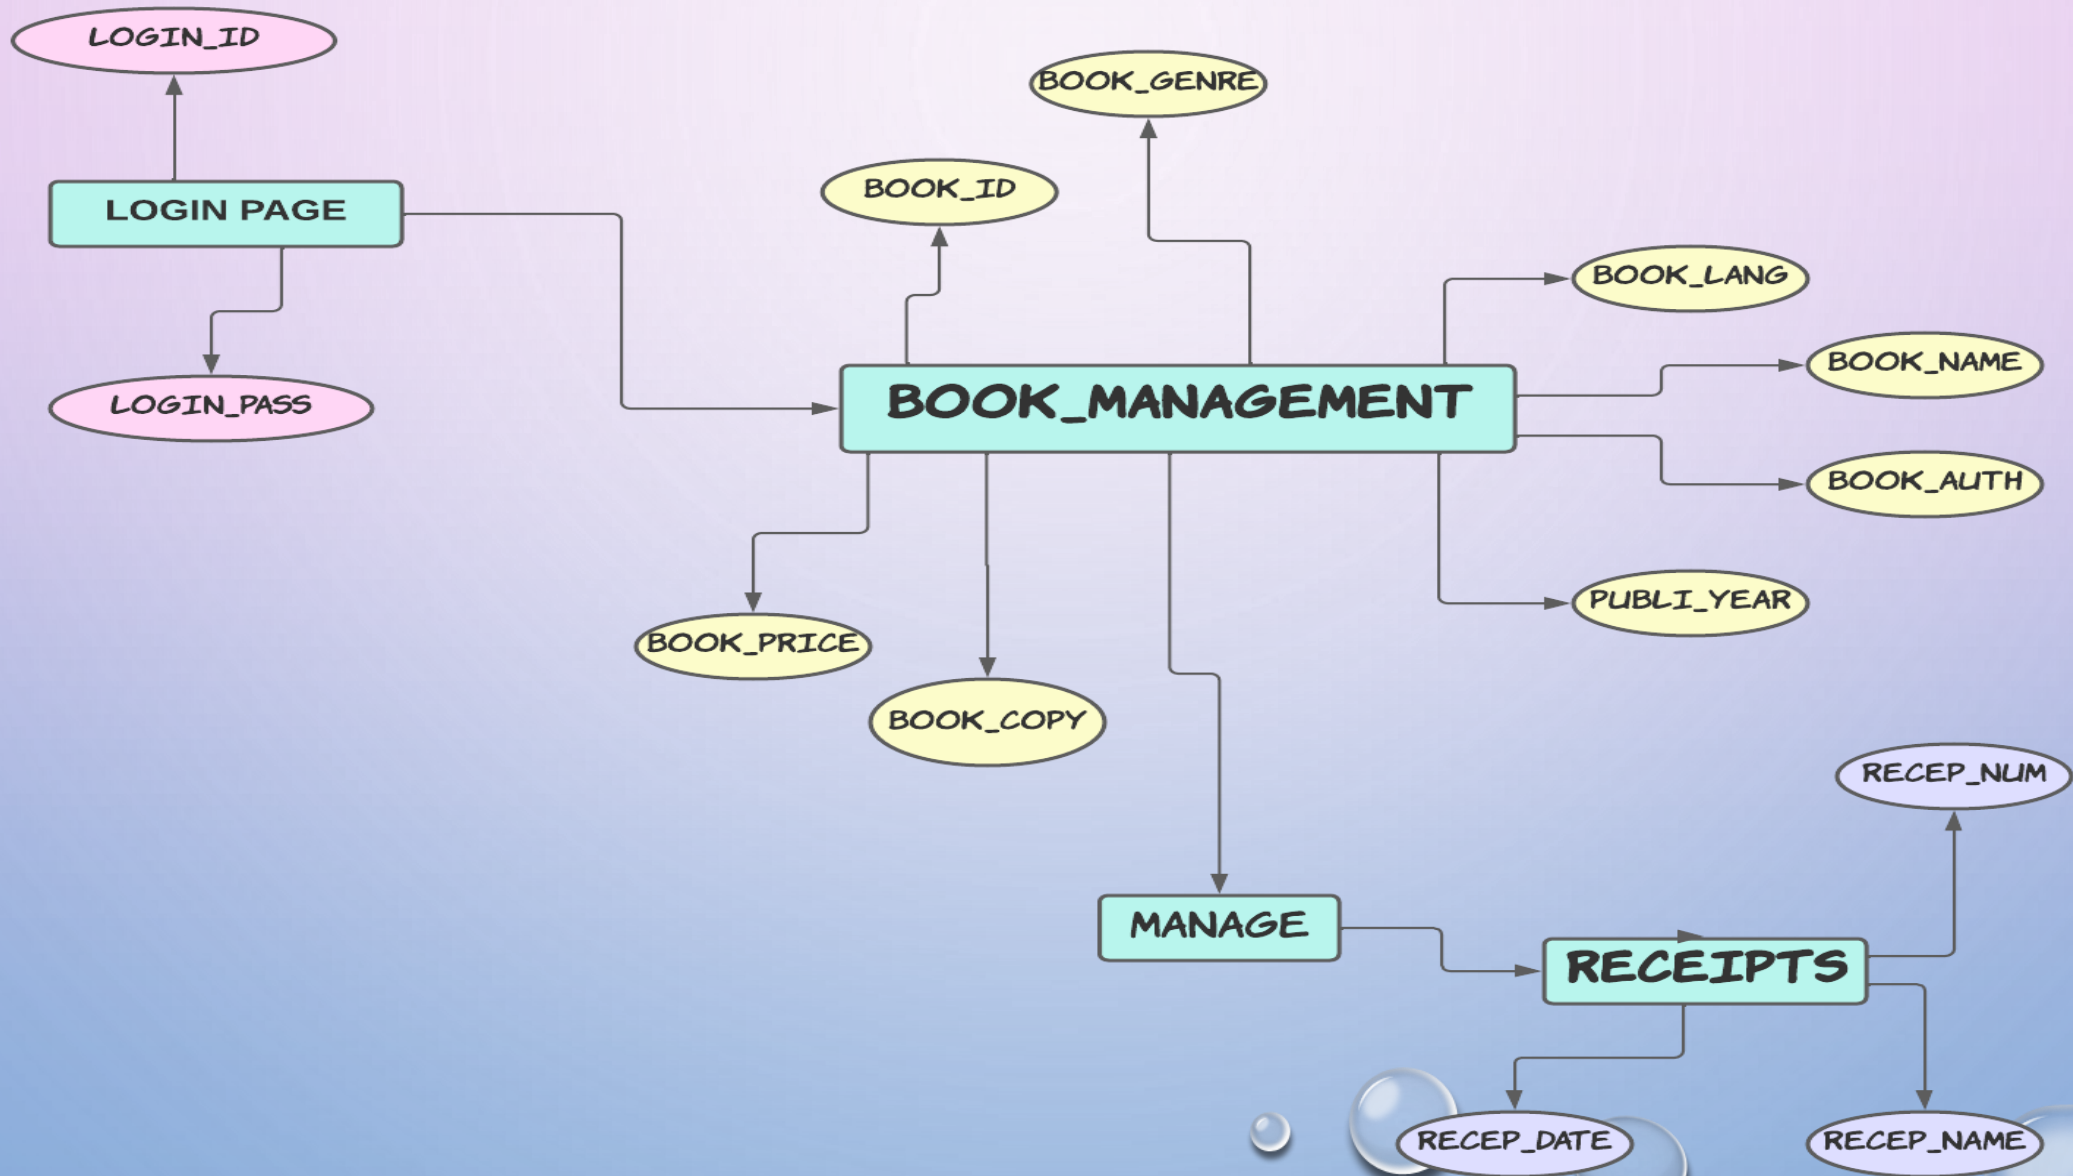

# Prerequisite software :

1. Python Interpreter,
2. Vs Studio Code Editor,
3. MySQL Server,
4. MySQL Workbench 8.0 CE,
5. Notepad,
6. ER Diagram Maker.

# INTRODUCTION:

- This mini project is the sample project for managing book.
- Project system that offers many flexible and convenient features.
- Only basic knowledge of python and tkinter library is required for operation.
- Consist of all information of books and books insertion , deletion etc.
- It is beneficial for the user to easy access through this connector.
- It is a GUI interface for the managing the book in the library or shop

# ER Diagram :

# Database Table :

```
MySQL 8.0 Command Line Client
| student_admission |
| sys                |
+-----+
9 rows in set (0.03 sec)

mysql> use book_management;
Database changed
mysql> show tables;
+-----+
| Tables_in_book_management |
+-----+
| book_management           |
+-----+
1 row in set (0.01 sec)

mysql> select * from book_management;
```

Book_Id	Book_Genre	Book_Lang	Book_Name	Book_Auth	Publish_year	Book_copy	Book_Price

```

# PROPOSED WORK:

❑ The project consist of following modules :

➤ Maintenance of book records.

1. Add new 2. Display 3. Update 4. Delete 5. Search 6. Reset 7.Exit

➤ Displaying the book table.

➤ Select the particular row from the table for the updation.

➤ Select the particular row form the table for the deletion.

➤ Select the particular row form the table for the searching.

# WHAT IS A BASE OF PROJECT ?

Project name is the “book management system ” which include the python , mysql And python library tkinter language. Python offers multiple options for developing GUI (graphical user interface). Out of all the GUI methods, tkinter is the most commonly used method. It is a standard python interface to the tk GUI toolkit shipped with python. Python with tkinter is the fastest and easiest way to create the GUI applications. Creating a GUI using tkinter is an easy task.

## **To create a tkinter app:**

- 1.Importing the module – tkinter
- 2.Create the main window (container)
- 3.Add any number of widgets to the main window
- 4.Apply the event trigger on the widgets.

## How to connect MYSQL server to Python Interpreter?

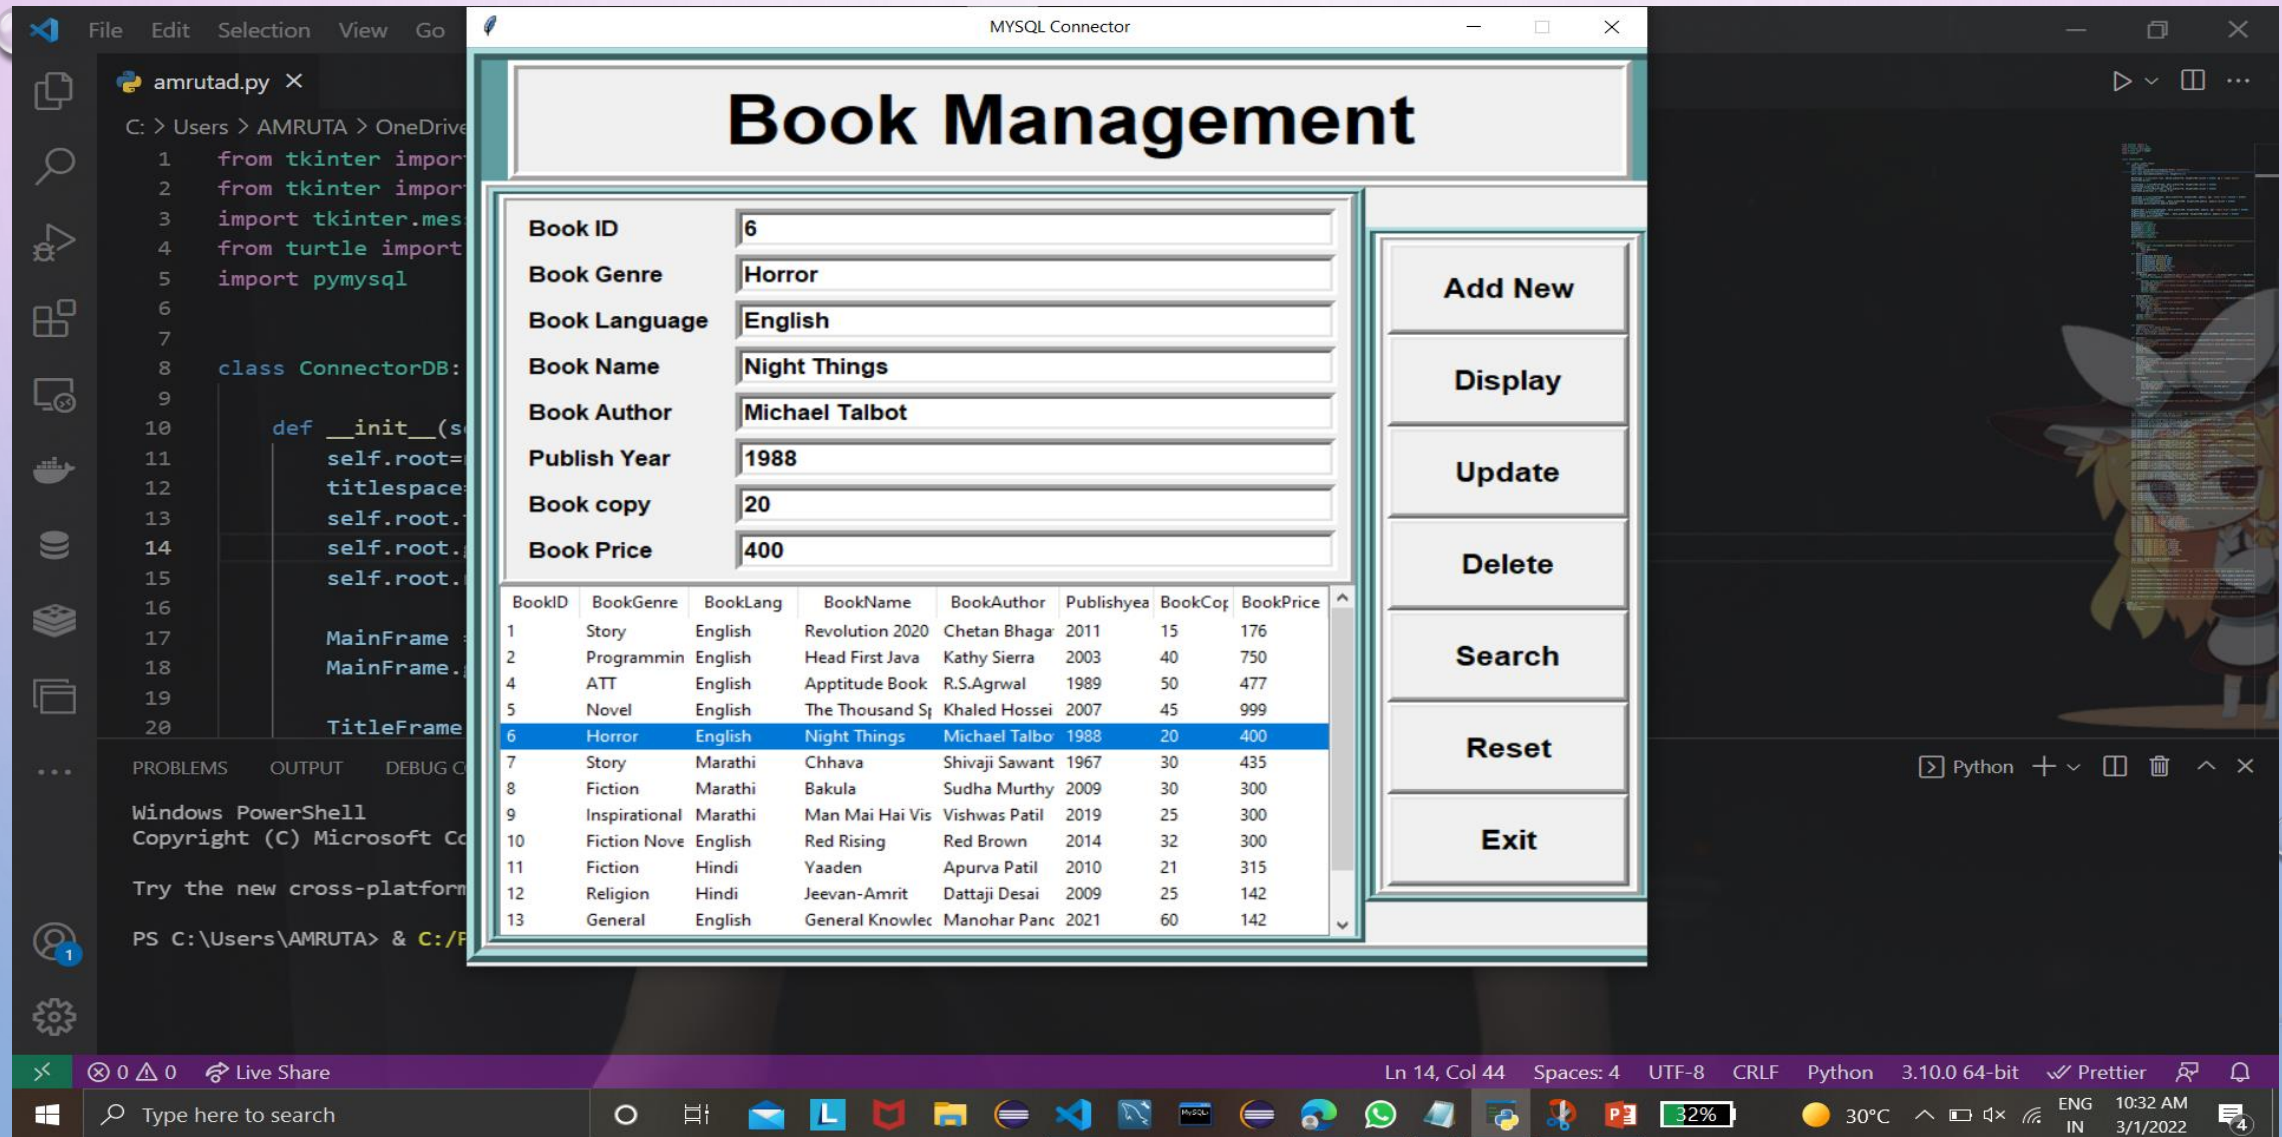

- To connect to the mysql server we have to install pymysql.
- Then we have to connect localhost to python interpreter.
- We have also gave password in the source code.
- We have insert correct query for the particular function.

# MYSQL Connector Table :

**Book Management**

Book ID: 6  
Book Genre: Horror  
Book Language: English  
Book Name: Night Things  
Book Author: Michael Talbot  
Publish Year: 1988  
Book copy: 20  
Book Price: 400

BookID	BookGenre	BookLang	BookName	BookAuthor	Publishyea	BookCop	BookPrice
1	Story	English	Revolution 2020	Chetan Bhaga	2011	15	176
2	Programmin	English	Head First Java	Kathy Sierra	2003	40	750
4	ATT	English	Apptitude Book	R.S.Agrwal	1989	50	477
5	Novel	English	The Thousand S	Khaled Hossei	2007	45	999
6	Horror	English	Night Things	Michael Talbo	1988	20	400
7	Story	Marathi	Chhava	Shivaji Sawant	1967	30	435
8	Fiction	Marathi	Bakula	Sudha Murthy	2009	30	300
9	Inspirational	Marathi	Man Mai Hai Vis	Vishwas Patil	2019	25	300
10	Fiction Nove	English	Red Rising	Red Brown	2014	32	300
11	Fiction	Hindi	Yaaden	Apurva Patil	2010	21	315
12	Religion	Hindi	Jeevan-Amrit	Dattaji Desai	2009	25	142
13	General	English	General Knowlec	Manohar Panc	2021	60	142

Buttons: Add New, Display, Update, Delete, Search, Reset, Exit

Python 3.10.0 64-bit

# Conclusion :

- This system allows the user to display the book details.
- Also allows to update the data of table.
- And also insert new data into table.
- Easier to use system to whom don't know about the mysql query.
- The system is strong enough to provide security to the data
- Provided facility of reset , search ,delete the data from the table.
- Improved efficiency and effectiveness in administration

THANK YOU.
